## RACE MEET WAS A BIG SUCCESS

ATTENDANCE AT KAPIOLANI PARK SATURDAY WAS LARGE—EVENTS WELL PULLED OFF.

The afternoon crowd at the race track on Saturday was much larger than that of the morning and though the morning event in which Isenberg's filly Creola her record-breaking trotting and pacing, 2:30 class, was probably the best vent of the day, there were some fine contests and there was more enthusiasm. Creola did not win just race, being beaten in the two afternoon heats, but no one expected her on her first appearance on the track, to carry away the prize. She broke the record and Isenberg was so happy that he offers a \$200 cup, for the lowering of her time of 2:18.

Another feature of the day was the breaking of the track record in the three-fourths mile dash. It was a dead heat between Defender and Bruner, in 1:15. In the return Defender was beaten in 1:18.

The final contents of the day between Cyclone and Sambo and Billy Lemp showed a complete reversal of the morning conditions. Sambo, the winner of the early races, was shut out in the first heat of the last race. Cyclone won the final heat against Lemp coming in in 2:17 1-2.

Bruner surprised nearly everyone by winning the last event after a hard day's work. Dikeland was quite heavily backed and so was picked by many in preference to Bruner, who it was thought must be played out. Bruner, however, took the race from the start and came in a length ahead in 2:44 3-5 for the mile and a half.

### THE BRITISH INCOME TAX.

The income tax was introduced into England by William Pitt—who otherwise had his points—in 1799 under the stress of the French war. It ceased in 1816, but was revived by the dastardly Sir Robert Peel in 1842, and extended by the iniquitous Gladstone in 1853. From being a temporary war tax it has now become a permanent part of the British financial system, and is resorted to by every chancellor who finds himself in difficulties. It is not such an iniquitous tax as you would think, as one-half of the amount collected is not assessed directly on the ultimate payers but at the source of origin. I own stock, let us say, in a railroad and industrial company. The income tax is assessed on and collected from the railroad company in one sum, and the burden of it distributed among the stockholders in proportion to their holdings. My dividends, that is, reach me "less income tax." In this way evasion is made extremely difficult, the productivity of the tax is largely increased, and its incidence is deprived of that personal element and that direct contact between the individual and the tax-collecting agency which are usually responsible for the unpopularity of imposts. On the whole it is probably true to say that in no other way can the wealth derived from property and investments be so adequately, so regularly, and—equally laid under contribution.—Sydney Brooks in Harper's Weekly.

### ALTITUDE AND VOICE.

Generally speaking, races living at high altitudes have weaker and more highly pitched voices than those living in regions where the supply of oxygen is more plentiful. Thus in America, among the Indians living on the plateau between the ranges of the Andes, at an elevation of from 10,000 to 14,000 feet, the men have voices like women, and the women like children

and their singing is a shrill monotone.
